**Appendix A**

**I. (a) Data Completeness:**

**The Percent of Children Included in your State's 2021 Outcomes Data (Indicator C3)**

Data completeness was calculated using the total number of Part C children who were included in your State's FFY 2021 Outcomes Data (C3) and the total number of children your State reported in its FFY 2021 IDEA Section 618 data. A percentage for your State was computed by dividing the number of children reported in your State's Indicator C3 data by the number of children your State reported exited during FFY 2021 in the State's FFY 2021 IDEA Section 618 Exit Data.

<b>Data Completeness Score</b>	<b>Percent of Part C Children included in Outcomes Data (C3) and 618 Data</b>
<b>0</b>	<b>Lower than 34%</b>
<b>1</b>	<b>34% through 64%</b>
<b>2</b>	<b>65% and above</b>

**Appendix B**

**I. (b) Data Quality:**

**Anomalies in Your State's FFY 2021 Outcomes Data**

This score represents a summary of the data anomalies in the FFY 2021 Indicator 3 Outcomes Data reported by your State. Publicly available data for the preceding four years reported by and across all States for each of 15 progress categories under Indicator 3 (in the FFY 2017 – FFY 2020 APRs) were used to determine an expected range of responses for each progress category under Outcomes A, B, and C. For each of the 15 progress categories, a mean was calculated using the publicly available data and a lower and upper scoring percentage was set 1 standard deviation above and below the mean for category a, and 2 standard deviations above and below the mean for categories b through e<sup>7</sup>. In any case where the low scoring percentage set from 1 or 2 standard deviations below the mean resulted in a negative number, the low scoring percentage is equal to 0.

If your State's FFY 2021 data reported in a progress category fell below the calculated "low percentage" or above the "high percentage" for that progress category for all States, the data in that particular category are statistically improbable outliers and considered an anomaly for that progress category. If your State's data in a particular progress category was identified as an anomaly, the State received a 0 for that category. A percentage that is equal to or between the low percentage and high percentage for each progress category received 1 point. A State could receive a total number of points between 0 and 15. Thus, a point total of 0 indicates that all 15 progress categories contained data anomalies and a point total of 15 indicates that there were no data anomalies in all 15 progress categories in the State's data. An overall data anomaly score of 0, 1, or 2 is based on the total points awarded.

<b>Outcome A</b>	<b>Positive Social Relationships</b>

**Appendix C**

**II. (a) Data Comparison:**

**Comparing Your State's 2021 Outcomes Data to Other States' 2021 Outcome Data**

This score represents how your State's FFY 2021 Outcomes data compares to other States' FFY 2021 Outcomes Data. Your State received a score for the distribution of the 6 Summary Statements for your State compared to the distribution of the 6 Summary Statements in all other States. The 10th and 90th percentile for each of the 6 Summary Statements was identified and used to assign points to performance outcome data for each Summary Statement<sup>9</sup>. Each Summary Statement outcome was assigned 0, 1, or 2 points. If your State's Summary Statement value fell at or below the 10th percentile, that Summary Statement was assigned 0 points. If your State's Summary Statement value fell between the 10th and 90th percentile, the Summary Statement was assigned 1 point, and if your State's Summary Statement value fell at or above the 90th percentile the Summary Statement was assigned 2 points. The points were added up across the 6 Summary Statements. A State can receive a total number of points between 0 and 12, with 0 points indicating all 6 Summary Statement values were at or below the 10th percentile and 12 points indicating all 6 Summary Statements were at or above the 90th percentile. An overall comparison Summary Statement score of 0, 1, or 2 was based on the total points awarded.

*Summary Statement 1: Of those infants and toddlers who entered or exited early intervention below age expectations in each Outcome, the percent who substantially increased their rate of growth by the time they turned 3 years of age or exited the program.*

*Summary Statement 2: The percent of infants and toddlers who were functioning within age expectations in each Outcome by the time they turned 3 years of age or exited the program.*

**Appendix D**

**II. (b) Performance Change Over Time:**

**Comparing your State's FFY 2021 data to your State's FFY 2020 data**

The Summary Statement percentages in each Outcomes Area from the previous year's reporting (FFY 2020) is compared to the current year (FFY 2021) using the test of proportional difference to determine whether there is a statistically significant (or meaningful) growth or decline in child achievement based upon a significance level of  $p \leq .05$ . The data in each Outcome Area is assigned a value of 0 if there was a statistically significant decrease from one year to the next, a value of 1 if there was no significant change, and a value of 2 if there was a statistically significant increase across the years. The scores from all 6 Outcome Areas are totaled, resulting in a score from 0 – 12. The Overall Performance Change Score for this results element of '0', '1', or '2' for each State is based on the total points awarded. Where OSEP has approved a State's reestablishment of its Indicator C3 Outcome Area baseline data the State received a score of 'N/A' for this element.

**Test of Proportional Difference Calculation Overview**

The summary statement percentages from the previous year's reporting were compared to the current year using an accepted formula (test of proportional difference) to determine whether the difference between the two percentages is statistically significant (or meaningful), based upon a significance level of  $p \leq .05$ . The statistical test has several steps.

Step 1: Compute the difference between the FFY 2021 and FFY 2020 summary statements.

e.g.,  $C3A\ FFY2021\% - C3A\ FFY2020\% = \text{Difference in proportions}$

Step 2: Compute the standard error of the difference in proportions using the following formula which takes into account the value of the summary statement from both years and the number of children that the summary statement is based on<sup>10</sup>

$\text{Sqrt}([(FFY2021\% * (1-FFY2021\%)) / FFY2021N] + [(FFY2022\% * (1-FFY2022\%)) / FFY2022N]) = \text{Standard Error of Difference in Proportions}$

Step 3: The difference in proportions is then divided by the standard error of the difference to compute a z score.

$\text{Difference in proportions} / \text{standard error of the difference in proportions} = z \text{ score}$

Step 4: The statistical significance of the z score is located within a table and the p value is determined.

Step 5: The difference in proportions is coded as statistically significant if the p value is it is less than or equal to .05.

Step 6: Information about the statistical significance of the change and the direction of the change are combined to arrive at a score for the summary statement using the following criteria

- 0 = statistically significant decrease from FFY 2020 to FFY 2021
- 1 = No statistically significant change
- 2= statistically significant increase from FFY 2020 to FFY 2021

Step 7: The score for each summary statement and outcome is summed to create a total score with a minimum of 0 and a maximum of 12. The score for the test of proportional difference is assigned a score for the Indicator 3 Overall Performance Change Score based on the following cut points:

Indicator 3 Overall Performance Change Score	Cut Points for Change Over Time in Summary Statements Total Score
0	Lowest score through 3
1	4 through 7
2	8 through highest

<sup>10</sup>Numbers shown as rounded for display purposes.
